

PRODUCT FACT SHEET

ULTRA SEASONAL PROTECTOR

Highest quality echinacea and goldenseal plus a unique blend of Western and Chinese herbs to assist body defenses.

KEY FEATURES

- Unique blend of Western and Chinese herbs for more complete formula.
- Utilizes special blend of Goldenseal, Goldthread and Oregon Grape, rather than just Goldenseal, to help preserve natural supplies of these potentially endangered plants.
- High potency, full spectrum formula made under strict quality control regulations in our federally registered pharmaceutical manufacturing facility.
- ADVANCED HERBAL DELIVERY SYSTEM® processing provides a superior product compared to typical herbals because it results in an extract. Most herbal products simply consist of cut and dried plants. This formula provides the power of a liquid in the convenience of a capsule, which increases patient compliance.
- Extracted using high-tech processes which mimic traditional methods used in China and other cultures that use herbs medicinally. The result is easier digestibility, as well as excellent bioavailability and effectiveness. (See reverse for more information.)
- Free of corn, soy, yeast, wheat, gluten, peanuts, tree nuts, crustacean shellfish, fish, egg and milk products
- Vegetarian and Vegan

ULTRA SEASONAL PROTECTOR

ITEM #: 0991

HOW SUPPLIED

Light green powder in clear vegetarian capsules; 50 per bottle.

DIRECTIONS

As a dietary supplement, one to three capsules a day with a large glass of water (preferably warm) or prepared as a tea. Take between meals.

CONTRAINDICATIONS

Do not take if pregnant. Lactating women, persons with special medical situations and those taking medicines should consult their health care professionals before using this product. For short term use only. Keep out of the reach of children.

Supplement Facts

Serving Size 3 Capsules Servings Per Container 16.6

Amount Per Three Capsules	% Daily Value
1,500 mg Herbal Extract Powder providing:	
Bayberry Bark (<i>Myrica nagi</i>).....	46.4 mg *
Cayenne Fruit (<i>Capiscum annum</i>).....	30.5 mg *
Chamomile Flower (<i>Chamomilla recutita</i>).....	46.4 mg *
Chinese Licorice Root	
(<i>Glycyrrhiza uralensis</i>).....	77.3 mg *
Echinacea Herb (<i>Echinacea purpurea</i>).....	402 mg *
Echinacea Root (<i>Echinacea angustifolia</i>).....	77.3 mg *
Fennel Seed (<i>Foeniculum vulgare</i>).....	46.4 mg *
Ginger Root (<i>Zingiber officinale</i>).....	46.4 mg *
Goldenseal Root (<i>Hydrastis canadensis</i>).....	133 mg *
Goldthread Rhizome (<i>Coptis chinensis</i>).....	133 mg *
Oregon Grape Root (<i>Berberis aquifolium</i>).....	133 mg *
Parsley Leaf (<i>Petroselinum sativum</i>).....	46.4 mg *
Red Clover Herb (<i>Trofolium pratense</i>).....	50 mg *
Reishi Mushroom (<i>Ganoderma lucidum</i>).....	77.3 mg *
Cardamom Fruit (<i>Amomum vilosum</i>).....	77.3 mg *
Shiitake Mushroom (<i>Lentinus edodes</i>).....	77.3 mg *

* Daily Value not established.

ANABOLIC LABORATORIES

Pharmaceutical Made Nutritional Products Since 1924

PRODUCT:

ULTRA SEASONAL PROTECTOR

ITEM #: 0991

BACKGROUND

Anabolic's innovative Advanced Herbal Delivery System® processing begins with the purchase of whole plant parts from the finest suppliers of medicinal plants throughout the world. Next, they are inspected and species identified by chemists and herbal specialists using the latest laboratory techniques and state-of-the-art equipment to ensure highest quality, purity and potency. In addition to microbiological assays, these tests include various forms of chromatography and mass spectrometry -- advanced analytical methods used to separate components and measure quality and quantity of active components.

The plants are then ground and put through a special extraction procedure called thermokinetic maceration/percolation, specially developed for each individual herb. This process breaks open plant cell walls and releases the primary active components from inside the cells. This makes the herb more bioavailable and more easily

digested than simply grinding up the plant the way most herbal products are prepared. This process also "cleans" the material safely and efficiently, eliminating the need for other forms of sterilization. The Advanced Herbal Delivery System® process uses high-tech methods to mimic the way herbs are prepared in China and other countries where herbs are routinely used in health care, offering the best of modern science and traditional preparation.

In the next step of the ADVANCED HERBAL DELIVERY SYSTEM® process, the extracted components are recombined with the cell wall material, called the marc. This is done in order to preserve all beneficial factors naturally present in the whole herb. The result is a complete, full-spectrum, high quality formula with improved digestibility, optimal bioavailability and superior patient compliance compared to inconvenient liquid extracts.

THE ANABOLIC DIFFERENCE

Anabolic Laboratories' nutritional products are made in a registered, licensed and inspected pharmaceutical facility. Our in-house laboratories and manufacturing facilities are routinely inspected by the United States Food and Drug Administration (FDA) and Drug Enforcement Administration (DEA). We also maintain a Good Manufacturing Practice (GMP) certification from the Natural Products Association.

As a pharmaceutical manufacturer, the standards used for raw materials, production and finished product testing exceed FDA requirements for the nutritional products industry. Our pharmaceutical requirements for manufacturing are the foundation for the guaranteed quality of our nutritional products. Anabolic Laboratories sets the nutritional supplement industry standard for label accuracy, potency and purity as dictated by the FDA for pharmaceutical and nutritional products.
